Setup and Deal

Determining the Turn Order

For casual games, any seating arrangement will do.

For competitive games, shuffle one of each Wind tile face down and have players draw them. Each player seats according to the Wind they drew.

After the first round, if East loses the round then Seat Winds pass counterclockwise (South becomes East, East becomes North, etc.)

Building the Wall

After determining the seating order, shuffle all the tiles. Then, each player builds a wall in front of them, 18 tiles long and two tiles high. After the walls are built, push them together to form a square.

Dealing the Tiles

East rolls two dice and counts counter-clockwise, starting with their wall, to determine the break wall. The break wall player rolls the dice again and counts tiles from right to left to determine the breakpoint. The eight tile stacks to the right of the breakpoint form the Dead Wall. Deal 4 sets of 4 tile stacks to each player from the Live Wall counter-clockwise, removing tiles from the Live Wall clockwise; for the final tiles, East draws an extra tile from the Wall for 17 tiles total. Allow players to declare Bonus Tiles before East's first turn, in turn order.

The Dead Wall

The Dead Wall consists of 16 tiles taken from the tail-end of the Wall that are removed from play. However, when a player declares a Kong or Bonus Tile, that player draws a tile off the Dead Wall's tail-end. The Dead Wall must always be 16 tiles. The drawn tile is replaced by moving the tile at the end of the Live Wall to the front end of the Dead Wall

On Your Turn

Draw a tile from the Live Wall for a total of 17 tiles (East does not draw on their first turn). If you have Mahjong, declare it to win the round. Otherwise, discard down to 16 tiles, set your discarded tile clearly in front of you, and then end your turn. Another player may claim the discarded tile before the next turn begins.

Claiming Discards

The most recent discard can be claimed only if it completes a set or Mahjong. Chows may only be called from the player to your left. Pungs, Kongs, and Mahjong may be called on any player. When declaring a set, reveal the tiles from your hand to prove the discarded tile completes a set. Then, take the discarded tile and the tiles from your hand and meld them to the table. Rotate the discarded tile sideways and place it to the left, center, or right to indicate which player discarded it. Play then proceeds to the right of the discard claimer.

Discard Disputes

If two players make a claim on the same tile, resolve it in this order:
1. Mahjong
2. Pung/Kong
3. Chow

Ending the Round

The winning player declares Mahjong; all players reveal their hands and the round ends. Only the winning hand is scored. Exhausting the Live Wall with no Mahjong is a draw and ends the round. Shuffle the tiles and begin the new round.

Round Wind

The Prevalent Wind is the Table's Wind and rotates counter-clockwise whenever the original East player rotates back into the East position again (4 rounds if East never wins). Play the game through 4 wind rotations (16 rounds if East never wins).

Basic Sets

Chow

Three in a row

Three of a kind

Four of a kind

Melded Pungs can only be upgraded to a Kong by drawing the tile. During a player's turn, if they have 4 of the same tile in their hand, they may declare Kong. Then, meld the tiles face down to form a concealed Kong.

Concealed Sets

If a tile completing a Pung or a Chow was drawn from the Wall do not reveal it to other players

How to Win

MAHJONG • 5-Point Minimum

Mahjong Irregularities

A Mahjong containing one or more Kongs will have more than 17 tiles. Seven Pairs and a Pung doesn't follow the five sets and a pair model.

Flower and Season Tiles

During a player's turn, if they have a Flower/Season tile in their hand, they immediately declare it and meld the tile face up, drawing a replacement tile from the Dead Wall.

Each Flower/Season tile is associated with a Wind: 1 = East, 2 = South, 3 = West, 4 = North.

Pamphlet designed by Nathanael J. Reynolds

1-Point Patterns

Flower Tiles

One bonus point for each declared Flower

No Flower Tiles

No Flower tiles in hand

Value Honor

A Pung and/or Kong of a Dragon tile or player's Seat Wind

No Honors

No Dragons and/or Winds

Self-Drawn

Winning tile is one drawn from the wall

Melded Kong

A melded Kong

Robbing the Kong

A player may declare Mahjong off a tile that another player attempts upgrade melded Pung to a Kong

Last Tile Draw

Winning upon drawing the final tile in the wall

Concealed Hand

Every set must be concealed; complete the pair by discard claim

2-Point Patterns

Concealed Kong

A concealed Kong

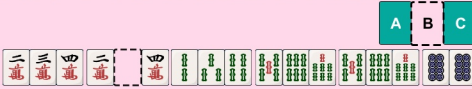

Single Wait

Final tile to win is the tile completing the pair

Closed Wait

Final tile to win is the middle tile in a Chow e.g. 5 in 4, 5, 6

Two Concealed Pungs

Two concealed Pungs and/or Kongs

3-Point Patterns

No Flower or Honor Tiles

No Flower or Honor tiles in hand.

Fully Concealed Hand

Every set must be concealed with the pair completed by self-draw

All Chows with Flowers or Honors

Only Chows

5-Point Patterns

Three Concealed Pungs

Three concealed Pungs and/or Kongs

Win Within 5 to 10 Discards

Winning when there are more than five but less than ten discards on the table

Pure Straight

Three consecutive Chows from one to nine in a single suit

Little Three Winds

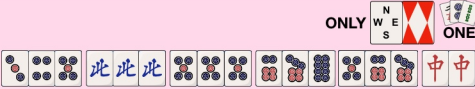

Two Pungs and/or Kongs of Winds and a pair of Winds

10-Point Patterns

Half Flush

Only one suit and Honor tiles

All Pungs

Only Pungs and/or Kongs

All Chows

Only Chows and a pair of non-Honor tiles. No Flowers

Melded Hand

Every set and the pair must be completed with other players' discards

Win Within 5 Discards

Winning when there are less than five discards on the table

Little Three Dragons

Two Pungs and/or Kongs of Dragons and a pair of Dragons

Riichi

Declare Ready-to-win before first draw. Concealed hand.

Big Three Winds

Pungs and/or Kongs of three Winds

Four Concealed Pungs

Four concealed Pungs and/or Kongs

20-Point Patterns

Robbing the Flower

A player with seven Flower tiles may steal a Flower tile another player attempts to meld. Instantly wins the round, no other patterns are scored

Declaring Riichi

1. Say "riichi"
2. The player discards, turning the discarded tile sideways 90 degrees

Riichi may only be declared in the initial deal of the round before the player's first draw. A player may declare Riichi if they are one tile away from Mahjong and have not claimed any discards. Once Riichi is declared, the declaring player can no longer alter their hand in any way except for upgrading concealed Pungs to concealed Kongs. No wager is made.

30-Point Patterns

All Flowers

Having all eight Flower tiles. Instantly wins the round. No other patterns are scored

Little Four Winds

Three Pungs and/or Kongs of Winds and a pair of Winds

Big Three Dragons

Pungs and/or Kongs of each of the three Dragons

Seven Pairs and a Pung

Seven pairs and a Pung

40-Point Patterns

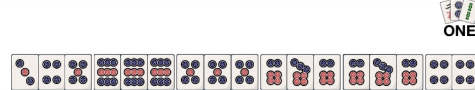

Big Four Winds

Pungs and/or Kongs of each of the four Winds

Full Flush

Only one suit

Blessings of Heaven

East player winning with their initial 14-tile hand

Blessings of Earth

Non-East player winning off of East's first discard

Five Concealed Pungs

Four concealed Pungs and/or Kongs

Scoring

When a player declares Mahjong, play stops, and the round ends. Only the winning player reveals their hand, and only the winning hand is scored. Calculate the hand's value by adding the points from the patterns in the hand, and the winner collects income accordingly:

If the Mahjong is completed by drawing the winning tile from the wall, all players pay the winner the hand's value.

If the Mahjong is completed by claiming a discard, the player responsible for the discard pays the winner the hand's value, and the other players do not pay.

Dealer Bonus

If East wins successive hands they receive a bonus. The first bonus hand is 2 points, the second is 4, the third is 6. If East wins by drawing the winning tile off of the Wall, all players pay the bonus, otherwise it is only paid by the player who discarded into East's Mahjong. If the hand is a draw, the round does not count as a win and the bonus resets back to 2.

If East loses a bonus hand by discarding into another player's Mahjong. East must pay that player the bonus (2 for the first bonus hand, 4 for the second, 6 for the third). If there are multiple winners, East pays each winner the full bonus amount due.

Taiwanese Furiten

If a player with a Read-to-Win hand misses claiming a discard to complete Mahjong, they are in Furiten and are prohibited from claiming Mahjong in the same go-around. They must discard a tile before being able to claim Mahjong. Mahjong calls are not permitted for both discard claims and drawing from the Wall until a tile is discarded. A player may still claim a tile while in Furiten for non-Mahjong calls.
