

TARGET SUMMARY

Growth/product data scientist and analytics data engineer with 8+ years using SQL, Python, experimentation, statistical analysis, dashboards, and scalable data workflows across Apple, Meta, DoorDash, and Inmar, including social, mobile, advertising, and commerce products. Experienced translating large-scale product data into clear decisions on adoption, retention, conversion, engagement, product quality, and operating efficiency. Ph.D.-trained quantitative researcher who partners well with PMs, engineers, and business stakeholders to define metrics, test hypotheses, and communicate unbiased, actionable insights.

CORE SKILLS

Product & Growth Analytics	Product analytics · growth metrics · activation/adoption · retention · engagement · conversion funnels · cohort analysis
Programming & Data	SQL · Python · pandas · Spark · Presto/Trino · Hive · Snowflake · Airflow · Dagster
Statistics & Modeling	A/B testing · inferential analysis · causal reasoning · statistical modeling · recommendation systems · forecasting
Dashboards & Reporting	KPI design · metric definitions · Sigma dashboards · executive-ready reporting · data storytelling · data-quality checks
AI & Scalable Workflows	AI-assisted triage · automated insight workflows · alert enrichment · repeatable analytics pipelines · stakeholder-ready summaries

EXPERIENCE

- Apple — Data Engineer** (contracted by TekSystems) 03/2024 – Present
- Built and owned Python/SQL monitoring and validation workflows for production analytics systems, improving real issue detection by 35% YoY while reducing false positives by 30–40%.
 - Defined baselines, core checks, and alert logic for recurring product and operational metrics, making deviations easier to detect, explain, and prioritize.
 - Designed Slack-integrated AI triage workflows that added context to alerts, reduced manual investigation time, and increased alert engagement by 20% with stable volume.
 - Partnered with engineering stakeholders to investigate metric anomalies, isolate data and pipeline issues, and translate findings into clear next steps.
- DoorDash — Analytics Data Engineer** (contracted by TekSystems) 08/2024 – 02/2025
- Built repeatable analytics pipelines and Sigma dashboards to track growth, market expansion, retention, conversion, redemption, and cohort performance for in-store deals.
 - Maintained adoption forecasting and milestone tracking for 50K+ cumulative redemptions, helping teams identify deviations from launch expectations and refine growth planning.
 - Analyzed A/B tests for new product features, defining segmented expectations for new vs. existing customers and informing UI strategies that improved conversion efficiency by 5–10%.
- Meta — Data Engineer / Analytics Data Engineer** 07/2020 – 04/2024
- Designed and owned scalable Presto/Spark data pipelines and dimensional models powering product analytics, experimentation, and decision-making across high-traffic product surfaces.
 - Built a CPU-savings metric and reporting workflow that converted system efficiency into a trackable product and quality KPI, driving a 15% increase in CPU-saving code changes and reducing compute costs.
 - Debugged data, metric, and pipeline anomalies across distributed systems; isolated root causes and restored trust in business-critical reporting outputs.
 - Measured product-safety and quality outcomes through rigorous experiments and analytics, showing +15% account recovery, 10% fewer teen-safety violator interactions, and 2% fewer risky media placements near ads.
- Inmar Intelligence | OwnerIQ — Senior Data Engineer / Senior Data Scientist** 07/2015 – 06/2020
- Built and launched 8+ data products, dashboards, and A/B frameworks across in-store and online commerce; led feasibility, requirements, validation, and delivery.
 - Developed recommendation and targeting pipelines using association-rule mining, Elasticsearch k-NN, Python, Airflow, Spark, Hive, Presto, and MySQL to generate bought/viewed-together insights and ROAS gains.
 - Created automated data-quality checks and customer-facing reporting workflows for commerce measurement, campaign analytics, and insight products used by business stakeholders.

EDUCATION

Certification, Data Science & Machine Learning — MIT Schwarzman College of Computing	Nov 2024
Ph.D., Psychological & Brain Sciences — Dartmouth College	
B.S., Biomedical Engineering (Biomechanics) — Case Western Reserve University
